Adding the Into SA Group to your safe sender list

SPAM filters and ISPs

Your Internet Service Provider (ISP) or email client may be using filters to block email and this may be affecting the receipt of emails from Into SA. If you believe this is happening, please consult the help section related to your email program below or contact your ISP directly to see how to relax or remove the settings that filter or block email.

This will ensure that correspondence from any company within the Into SA Group will be accepted.
